

App4Legal.v7.3 Release Notes

Important highlights from this release

1. You don't have to stick to our theme color any more. Unleash your creativity and make App4Legal fully about you! Customize the system's colors (full control of the buttons, tabs, menus, hovering, etc.), upload your logo, set your own theme and more.
2. It's all about the matter stage now! We revamped the process behind a litigation case by relating all needed information such as events, tasks, hearings, constitution date, court information, etc. to a specific matter stage. Head over to the 'Litigation Data' tab inside your litigation case and find out more.
3. Although we fully revamped the invoice template in our last release to allow full customization, we added some more tweaks to it (footer content, logo sizing, etc.) and fixed few bugs. Make sure to customize your invoice template the way you want by visiting the Money module in App4Legal (go to Settings, Invoice Templates).
