

# Create New Language

✔ Creating/modifying a language will automatically be updated on all user-end

To Create a new language, follow the below steps:

1. Click on "Create New Language" button from the "Language Configuration" screen

The screenshot shows the JIRA Administration interface. At the top, there is a search bar and navigation tabs for Applications, Projects, Issues, Add-ons, User management, and System. The left sidebar contains a menu for 'ATLASSIAN MARKETPLACE' and 'OUTLOOK TO JIRA', with 'Language Configuration' selected. The main content area is titled 'Outlook To JIRA Language Configuration' and includes a note: 'Any language created/modified will be automatically updated on the user-end.' Below the note, there is a 'Language' dropdown menu currently set to 'English' and a 'Create New Language' button highlighted with a blue box. A table of configuration options is visible below, with columns for the option name and its current value. A 'Save' button is located at the bottom left of the configuration area.

	Main Menu	Setup	Update	Preferences	Alerts
About	About				
Create	Create				
Create from e-mail	Create from e-mail				
Create New	Create New				
Go To JIRA	Go To JIRA

Check for updates	Check for updates				
Update	Update				

2. Enter the name of the language you'd like to create.

✔ Language name cannot consist of spaces or numbers. Only English alphabets with hyphen(-) are allowed.

### Outlook To JIRA Language Configuration

**Note:** Any language created/modified will be automatically updated on the user-end.

As a JIRA admin, you can create a new language in OTJ.
