

# Voice Recorder for Confluence

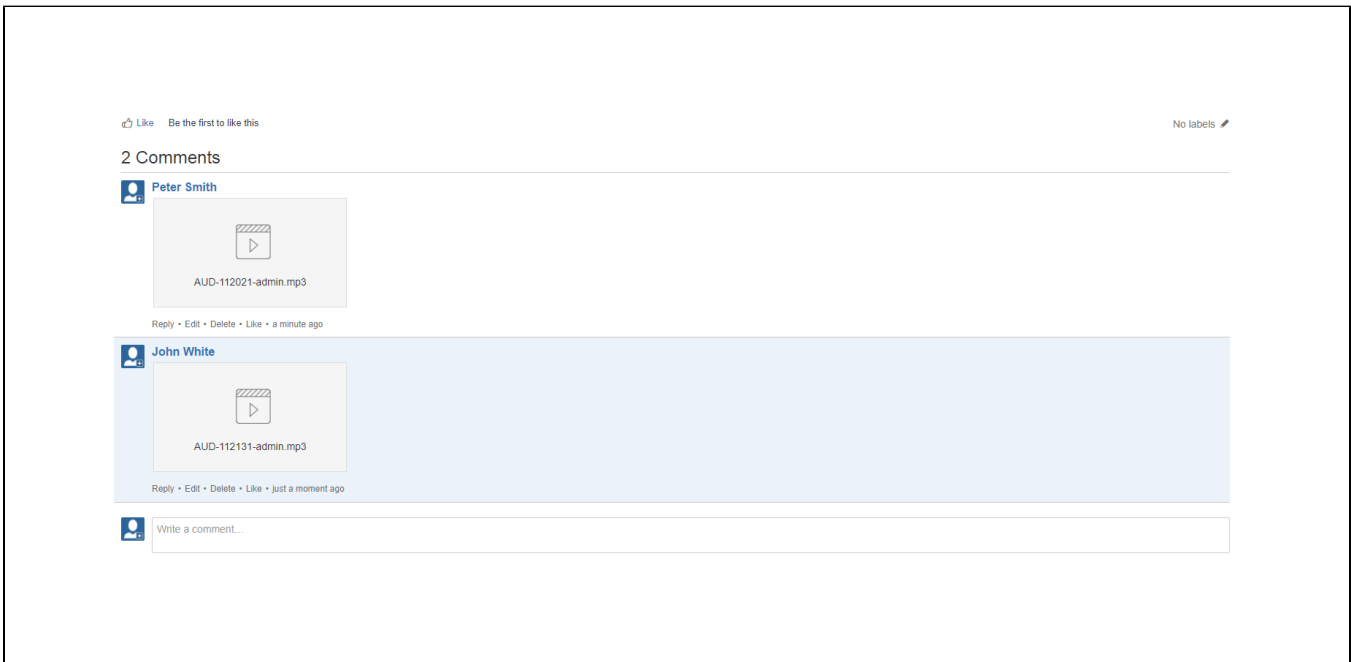

Simply improve and accelerate the collaboration with you team using Voice Recorder for Confluence.

Record a voice note upon adding a comment on any page in Confluence with the ability to play back in your comment!

Voice Recorder for Confluence App is the best solution you can rely on to speed up your communication on Confluence by easily recording you notes.

You have the option to either add a record directly, or comment & add a voice note with all details.

Voice Recorder for Confluence App allows you to quickly understand the comments and notes requested on any page. Now you can simply record your notes upon adding a comment.

Also you can simply record your notes & comments and they'll be added as attachments to the page.

You'll have the ability to include these voice notes as a link reference in your comment so they can be played directly from the comment.
