

# How to view your filters in Mobile for Jira

This article is meant to help users view their wanted filters in Mobile app.

**Mobile for Jira** displays only favourite filters in its home page dialog, so you need to make your filter a favourite one to view it.

## Step-by-step guide

Follow these steps to make a filter favourite one to be viewed in Mobile

1. Click on **Issues** in the top menu.
2. Select **Current search**.
3. Find the filter you want to view on Mobile and select it.
4. Click on the star (  ) icon to make this filter as favourite (check the below image).
