

Language Configuration

⚠ Only JIRA administrators can create/modify a language in OTJ.

In order to create/modify a language in OTJ, follow the below steps:

1. Login to JIRA using an **Administrator** account
2. Search for the “Settings” symbol in the top right corner

3. In the “JIRA Administrator” section click on “Add-ons”
4. Navigate to "Outlook To JIRA" section located in the left panel of the page.
5. Click on "Language Configuration"

- OUTLOOK TO JIRA
- AutoUpdate Configuration
- Language Configuration**
- OTJ Client

Outlook To JIRA Language Configuration

Note: Any language created/modified will be automatically updated on the user-end.

Language

- Plugin
- Setup
- Update
- Preferences
- Alerts
