

Mobile for Jira Architecture

Mobile for Jira consists of the following Apps:

- [Atlassian Add-on.](#)
- [Mobile for Jira Android App.](#)
- [Mobile for Jira iOS App](#)

Mobile for Jira Atlassian Add-on:

Mobile for Jira Add-on is needed for the below reasons:

- Check if user license is valid to enable **Mobile for Jira** usage.
- Add Push Notification needed configuration to Jira Products to support Instant Push Notification over users mobile devices.

This product is verified by **Atlassian** and set as **Top Vendor** on **Atlassian Marketplace**.

Mobile for Jira connectivity with Jira Server/Cloud:

Mobile for Jira Android and iOS apps establish connections over HTTP/HTTPS protocols and communicates with Jira Cloud/Server using **Jira Rest API's** published by Atlassian through this [link](#).

Mobile for Jira Push Notification feature

Mobile for Jira communicates with **FCM** (Firebase Cloud Messaging) to register Android and iOS devices for Push Notification for more details check this [link](#).
