

Delete/Restore Language

To Restore a language, follow the below steps:

1. Click on "Delete/Restore Language" button from the "Language Configuration" screen

The screenshot shows the 'Outlook To JIRA Language Configuration' interface. At the top, there is a navigation bar with 'Add-ons' selected. On the left, a sidebar lists 'ATLASSIAN MARKETPLACE' and 'OUTLOOK TO JIRA' options, with 'Language Configuration' highlighted. The main content area has a title 'Outlook To JIRA Language Configuration' and a note: 'Any language created/modified will be automatically updated on the user-end.' Below the note is a link 'Click here'. A 'Language' dropdown menu is set to 'English'. To its right are buttons for 'Create New Language' and 'Delete/Restore Language', with the latter highlighted by a blue box. Below these are several tabs: 'Main Menu', 'Setup', 'Update', 'Preferences', 'Alerts', 'Create', and 'Universal'. Under the 'Main Menu' tab, there are several input fields for configuration: 'About', 'Create from e-mail', 'Create New', 'Go To JIRA', 'Help', 'Createmenu', 'Preferences', 'Setup', and 'Check for updates'. A blue 'Save' button is located at the bottom left of the configuration area. At the bottom of the page, there is a message: 'We value and appreciate receiving your feedback, suggestions or questions to better improve your OTJ experience.'

2. Choose the language you'd like to restore and click the "Restore Defaults" button

You can only restore OTJ original languages. (English, Arabic, French, German, Spanish)
